

February 7, 2014

To Whom it may concern,

I would like to be considered for any open job positions at your company. I have a great deal of interest in computer programming and logic. I believe that this, along with the fact that I have been quite successful learning a variety of programming languages and implementing this knowledge to aid both fellow students with assignments and my father in the maintenance of his businesses website, make me a qualified candidate for such a position. I received a 3.5 in Computer Science I (using Java) (aka CS Java 1) last winter and have since obtained 4.0's in every subsequent course; including CS Java 2, I have completed every programming course offered at Olympic College including Introduction to C programming and Advanced C programming, in addition to various web development classes and will graduate this coming spring. I believe that this experience would make me a qualified candidate for such a position. I would welcome the opportunity to be given the chance to be a part of your team. Thank you in advance for your consideration of my qualifications.

Sincerely,

Christopher Ottersen
